

## Confidence. Control. Comfort.

Hundreds of clinicians were consulted in every aspect of the Aestiva/5's state-of-the-art design. The goal: to give you more confidence and control over how you interact with your patient. You can get closer to your patient with monitors that are easily viewed and controls that are conveniently located whether you are sitting or standing. Just another example of Datex-Ohmeda's award-winning ability to build superior anesthesia solutions.

- SmartVent™ - the shape of superior ventilation
- Integrated breathing system
- Open architecture
